

# Getting Started Guide for Annual Maintenance Customers

# YouSIMUL8 is the world's first simulation sharing website, allowing users to upload, share and interact with simulations from across the globe.

YouSIMUL8 enhances your overall SIMUL8 experience to offer even more benefits:

YouSIMUL8 is unique, allowing **anyone** to **view** and **change** simulations without having to buy and install simulation software. Users will be able to control the simulations, see detailed results tables, and gain insight into their processes.

The YouSIMUL8 window can be **embedded** in any website easily. That means that you can put your simulations **anywhere**, letting your customers, staff or visitors interact with them within any web page.

YouSIMUL8 works in a web browser allowing users to view their simulations on **any computer at anytime without the need for any plug-ins or downloads**, share them with colleagues and clients easily, and access their work everywhere.

# As a valued SIMUL8 Professional Annual Maintenance customer you are also entitled to a **Private Channel**.

A Private Channel allows you to upload your simulations to YouSIMUL8 but at the same time keeping them hidden from the public. This is useful when using sensitive data, or when simulating processes which you may not want to be seen out with your organization. As an Annual Maintenance customer you are entitled to 1 private model that can be simultaneously shared with up to 3 other users. These limits can be increased at any time, for more information please contact [sales@SIMUL8.com](mailto:sales@SIMUL8.com).

# Navigate to YouSIMUL8.com to get started

At the homepage of YouSIMUL8 you can see lots of interesting simulations you can view, either uploaded by SIMUL8 Corporation, or by many of our customers. These are public simulations, which are viewable by **anyone** who visits YouSIMUL8, however, your **Private Channel** entitles you to upload your simulations and have them completely **hidden** from public viewing.

Join the business simulation sharing community

#### Run

Instantly find, run and experiment with 1000's of simulations

#### Upload

Quickly upload and tag your own simulations

#### Share

Easily share your simulations with your co-workers

[What is Simulation? >>](#)

#### Featured Simulation: Photocopy

This simulation shows the impact of changing the number of photocopiers in a photocopy shop on the size of the queue.

You can adjust the number of copiers available by entering a value of 1 to 4 in the window that appears when you reset the simulation.

#### Manufacturing

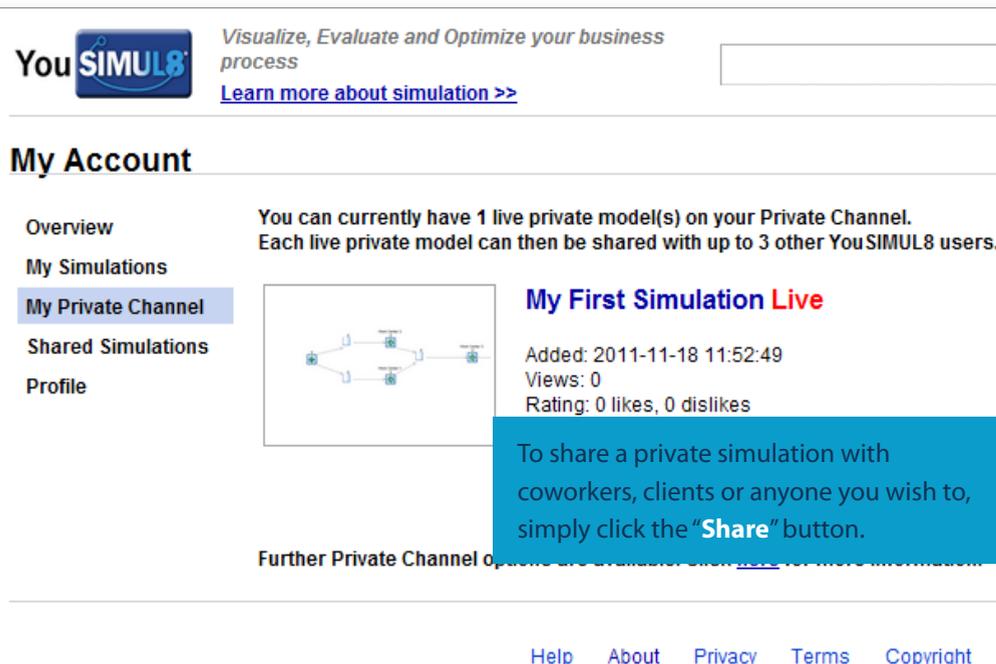

On the login screen, simply enter your SIMUL8 Live Passport email **address** and **password** supplied to you from previous correspondence following your Annual Maintenance order. If you have forgotten your password simply click "Forgot your password?" and follow the instructions. If you have forgotten your email address for your SIMUL8 Live Password, or did not receive the email with your details, then email **support@SIMUL8.com**.

# Uploading & Simulation Settings

The screenshot shows the 'Upload a SIMUL8 Simulation' form. At the top left is the 'You SIMUL8' logo with the tagline 'Visualize, Evaluate and Optimize your business process' and a link 'Learn more about simulation >>'. To the right is a search bar with a 'Search' button. The form title is 'Upload a SIMUL8 Simulation'. The form fields are: 'Title' (text input with 'My First Simulation'), 'Description' (text area with 'This is my first simulation built with SIMUL8 Professional.'), 'Category' (dropdown menu with '-- Select a category --'), 'Challenge' (checkbox, unchecked), 'Private Simulation' (checkbox, checked), and a 'Select SIMUL8 file and start upload' button. A blue callout box points to the button with the text: 'Click on the "Select SIMUL8 file and start upload" to browse to your simulation and begin the upload process.'

Here, you can set the **title**, **description** and **category** of your simulation. You can select if your simulation is a **challenge** simulation, this is a feature designed for more advanced users that use custom dialogs to create a game where the user can change some features to try and get the most efficient results. The checkbox allows you to select whether you wish your simulation to be private. If you do not check this box, your simulation **will be made public**. However, you can change this at any time from your My Account page.

To share a private simulation with coworkers, clients or anyone you wish to, simply click the **Share** button.

Further Private Channel options are available [here](#) for more information.

Help About Privacy Terms Copyright

After successfully uploading your file you will be greeted by a message explaining that the simulation is being **converted** to be used on the web. After the conversion process is complete, when you click on **“My Account”** and then either **“My Simulations”** if your simulation is public, or **“My Private Channel”** if you opted for a private simulation.

In this example, we’ve opted for a private simulation and can see that **“My First Simulation”** is live and viewable. If we decide that we want this simulation to be publicly available then we can simply click on the **“Make Public”** button. Similarly, if you decide your public simulation should no longer be so, you can click on a **“Make Private”** button.
